DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 and 23-36 are rejected under 35 U.S.C. 102(B) as being anticipated by Denisar.

In regard to claims 1, 23 and 29, the Denisar reference discloses a process for mixing one or more concentrates in a “vending machine” (see col. 2, line 62 – col. 3, line 3) comprising mixing a “concentrate” ((i.e., detergent) 114, 124 and 134) and “diluent” (water) in a “chamber” 130 and dispensing to a washing machine or storage chamber. Further, the user may select a “second” or even a “third” concentrate to be added (see col. 5, lines 15-20).

In regard to claims 2, 24 and 30, see column 8, lines 25-38.

In regard to claims 4-7, 27, 28, 33 and 34, the system uses granular material, which can be construed as a solid or powder.

In regard to claims 8, 26 and 32, see Figure 11.

In regard to claim 35, a combined product of 2 concentrates can be mixed within the wash tub.

In regard to claim 36, the above mixing would occur prior to the rinse cycle, which would dispense the mixture out of the machine.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3, 25 and 31 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Denisar.

The Examiner considers the configuration of Figure 1 (reservoirs mounted to the machine) to meet the claimed language, but in the event that Applicant is not convinced, attention is directed to the following. It would have been obvious to one having ordinary skill in the art at the time the invention was made to place the reservoirs within the machine, since it has been held that rearranging parts of an invention involves only routine skill in the art. *In re Japiske*, 86 USPQ 70.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Timothy L. Maust whose telephone number is (571) 272-4891. The examiner can normally be reached on Tue. - Thur. 6:30 - 5:00.
